SUMMARY

Backend-focused developer and recent NBCC Moncton graduate (June 2026). Builds REST APIs and full-stack web apps with C# and ASP.NET Core, and shipped a production application during a practicum at Gravitit. Strong with Entity Framework Core, authentication, testing, and multiple architectural styles (Clean, Layered, Vertical Slice). Open to remote roles across Canada.

TECHNICAL SKILLS

Languages	C#, SQL, JavaScript / TypeScript, Java, C++, HTML / CSS
Backend	ASP.NET Core (MVC & Web API), Entity Framework Core, ASP.NET Core Identity, JWT auth, FluentValidation, Serilog, REST API design
Data & Testing	SQL Server, PostgreSQL xUnit, Moq, Shouldly
Architecture	Clean Architecture, Layered / N-Tier, Vertical Slice, SOLID, unit testing
Cloud / DevOps	Azure (App Service, Container Apps - foundational), Docker, Git / GitHub
Frontend & Tools	React, JavaScript / TypeScript Visual Studio, VS Code, Postman, Scalar / OpenAPI

EXPERIENCE

Software Developer, Practicum

Apr 2026 - Jun 2026

Gravitit Tech Solutions (Remote)

- Built and deployed **TA-FLIGHTPLAN**, a production web app that digitizes the official ICAO flight plan and generates a print-ready PDF; live at miplandevuelo.com.
- Developed the app in ASP.NET Core 8 (MVC) with Entity Framework Core and SQL Server, organized as a five-project N-Tier solution with the domain layer independent of the web framework.
- Implemented authentication and role-based access (Pilot / Admin / SuperAdmin) using ASP.NET Core Identity, plus cross-field validation and airport autocomplete over a ~66,000-row dataset.
- Added structured logging and monitoring with Serilog and Application Insights.

Electronics Associate

Jun 2025 - Present

Walmart - Moncton, NB

- Provide technical support for consumer electronics, troubleshooting software and hardware issues across laptops, tablets, and networking gear.
- Translate technical specifications into plain language for non-technical customers, in English and French (learning).

Operations Apprentice

Aug 2023 - Aug 2024

Raizen - Ipaussu, Brazil

- Processed operational transactions in SAP (ERP), gaining hands-on exposure to enterprise software modules, data-integrity standards, and cross-department system integration.

PROJECTS

NB TCG Trader - Trading-Card Marketplace & Collection Manager (in progress)

ASP.NET Core Web API (.NET 9) • Vertical Slice • PostgreSQL • EF Core • JWT • React / TypeScript • Docker • Azure

- Designing a modular-monolith API using vertical slices, where each feature owns its endpoint, handler, validation, and DTOs.
- Bulk CSV / Excel import (CsvHelper / ClosedXML) that reconciles uploaded rows against an external card catalog (pokemontcg.io) into a visual digital collection.
- ASP.NET Core Identity with JWT access and rotating refresh tokens; FluentValidation, ProblemDetails error handling, rate limiting; documented with Scalar / OpenAPI; tested with xUnit + Shouldly.

RecipeWorld - Full-Stack Recipe Platform

ASP.NET Core MVC (.NET 8) • EF Core • SQL Server • ASP.NET Core Identity • xUnit • Moq

- Built a community recipe app with a service layer separating controllers from business logic and data access.
- Implemented role-based admin approval workflows, many-to-many relationships, code-first migrations, and unit tests.

Real-Time Smart Retail Inventory System - Full-Stack IoT (Capstone)

ASP.NET Core Web API • C# • EF Core • SQL Server • Chart.js • ESP32 (C++)

- Built an asynchronous REST API to ingest ESP32 sensor telemetry into SQL Server, with live time-series data visualized on an auto-polling Chart.js dashboard.

EDUCATION

Diploma in Software Development - New Brunswick Community College (NBCC), Moncton Jun 2026

CERTIFICATIONS

Foundational C# with Microsoft (freeCodeCamp) • C# Fundamentals (balta.io) • Connecting to MongoDB in C#

LANGUAGES

Portuguese (native) • English (fluent) • French (learning)
